Does not change anything:

```
vz ~ # vzctl set 101 --privvmpages 250M:300M --setmode restart --save
```

```
UB limits were set successfully
```

```
Saved parameters for VE 101
```

```
vz ~ # vzctl enter 101
```

```
entered into VE 101
```

```
cacti / # free -m
```

	total	used	free	shared	buffers	cached
Mem:	750	144	605	0	0	0
-/+ buffers/cache:		144	605			
Swap:	0	0	0			

And dmesg is clear. The only thing which helps is vzctl stop 101 && vzctl start 101...
