Mr.Ash wrote on Wed, 02 April 2008 12:19try this

```
vzctl set 101 --privvmpages 262144:262144 --save --setmod restart
```

i think error 250M:300M

Does not make any difference. And If I do with 250M:300M and vzctl stop/start after that container has new values, as it should.
