There are known issues about running a media UPnP server on VEs?
My host system is a Debian Lenny with vzctl 3.0.22 and kernel 2.6.18. VE is also a Debian Lenny with mediatomb server 0.11. When I try to run mediatomb, I receive:

```
2008-05-31 16:52:36    INFO: Loading configuration from: /etc/mediatomb/config.xml
2008-05-31 16:52:36    INFO: Checking configuration...
2008-05-31 16:52:36    INFO: Setting filesystem import charset to UTF-8
2008-05-31 16:52:36    INFO: Setting metadata import charset to UTF-8
2008-05-31 16:52:36    INFO: Setting playlist charset to UTF-8
2008-05-31 16:52:36    INFO: Configuration check succeeded.
2008-05-31 16:52:36   ERROR: main: upnp error -117
2008-05-31 16:52:36   ERROR: upnp_cleanup: UpnpUnRegisterRootDevice failed
```
