OK,

1. Do you know the root passwd of the HN? I mean do you know the passwd that was right and you typed it after "su" command on the HN and got an access to the HN. Now you are trying to use the same passwd with the "su" command but it always fails, aren't you?
  2. Are you able you use "sudo" instead "su" command?
  3. What did HN's holders try to do (the exact commands!) and what did they get (error messages or anything else).
