Hello,

Quote:
openvz-2.6.28-53

What do you have in mind?
Could you possibly show "ip a l" and "cat /proc/vz/veth" from HN before you've set
"vzctl set 167 --netif_add eth0 --save", then set eth0 inside VE and show "ip a l", "cat
/proc/vz/veth" again. And also "vzctl --version" and "uname -a" from HN.
