Hello,

just in case (it shouldn't take many time) please download the latest vzctl version from here <http://git.openvz.org/>, try with it (download via "git clone ([http|git](http://git))://git.openvz.org/pub/<project name> <destination dir>", ./autogen.sh, ./configure,make then use ./src/vzlist, ./src/vzctl binaries). Try with ./src/vzctl does this error still occur?
