Subject: Access TVcard from vps?

I'm about to install mythtv backend in a VPS, and add my Terratec Cinergy 1200 dvb-s card to the server.
As far as I can figure out it should be possible to access /dev/dvb on the HN from the vps by using something like vzctl set CTID --devnodes /dev/dvb:rw --save.

Is this at all possible? Anything I should watch out for?
