Subject: [PATCH 5/9] namespaces: utsname: use init_utsname when appropriate
Posted by serue on Thu, 18 May 2006 15:49:56 GMT
View Forum Message <> Reply to Message

In some places, particularly drivers and __init code, the init utsns is the
appropriate one to use. This patch replaces those with a the init_utsname
helper.

Changes: Removed several uses of init_utsname(). Hope I picked all the
right ones in net/ipv4/ipconfig.c. These are now changed to
utsname() (the per-process namespace utsname) in the previous
patch (2/7)

Signed-off-by: Serge E. Hallyn <serue@us.ibm.com>
