Hello,

Check this to cluster many containers

[http://wiki.openvz.org/HA\\_cluster\\_with\\_DRBD\\_and\\_Heartbeat](http://wiki.openvz.org/HA_cluster_with_DRBD_and_Heartbeat)

you can use LVS for Apache

[www.linuxvirtualserver.org](http://www.linuxvirtualserver.org)

and this for mysql cluster

<http://www.mysql.com/products/database/cluster/>

regards
