Unfortunately, I vaguely remember the details but the only one thing I know for sure that I've been able to compile zaptel module inside VE:

- zaptel-1.4.12.1
 - 2.6.18-92.1.1.el5.028stab057.2
 - centos 5 based VE + ovzkernel-devel-2.6.18-92.1.1.el5.028stab057.2.i686.rpm
-
