Subject: IPTables Error

I get this error when trying to start IPTables.

[root]# /etc/rc.d/init.d/iptables start
Flushing firewall rules: [OK]
Setting chains to policy ACCEPT: mangle filter [OK]
Applying iptables firewall rules: iptables-restore: line 70 failed
[FAILED]
[root]#

How do I fix this?

I have been told something about the kernel needs to recognize COMMIT. Anyone know how I can do either?
