Hi,
Here is my System Setup

Pentium III 900 MHZ

512 MB Ram

HDD1: 160GB

HDD2: 10GB

HDD3: 80GB

Partitions:

HDD1: 150GB /srv ext3 10GB Swap

HDD2: 10GB / ext3

HDD3: 80 GB /mount xfs

I've got all vServers Running in the 150Gig Partition.

I want to add the 80Gig Drive too an VPS 250 which shall be an fileserver containing samba etc.

The Problem is, how do i add it?

Thanks for your help.

Chris
