Hello

I can almost feel your frustration. Reading through docs and forum posts and not getting anywhere, frustrating!

I don't know if VENET should have a default gateway. I had problems getting my VE on the net, using VETH. I just needed to add a default route to my gateway, using the following command:

(from inside VE)

```
# route add default gw 192.168.1.1 dev eth0
```
