Hello,

Quote:

From your answer I guess this is not possible, unless I add an extra NIC to the hardware node?

No, my answer was about impossibility having two veth* interfaces on the HN with single eth interface inside VE.

The picture you've shown may be realized by two commands:

```
# vzctl set 101 --netif_add eth0 --save  
# vzctl set 101 --netif_add eth1 --save
```
