Hi,

I am getting a number of following messages when booting the OpenVZ kernel

```
[root@localhost ~]# grep NOHZ /var/log/messages
Mar  6 00:30:20 localhost kernel: NOHZ: local_softirq_pending 20
Mar  6 00:30:20 localhost kernel: NOHZ: local_softirq_pending 10

Mar  6 11:23:55 localhost kernel: NOHZ: local_softirq_pending 10
```

But I am able to get the system up with that kernel.

```
[root@localhost ~]# uname -a
Linux localhost.localdomain 2.6.22-ovz005 #1 SMP Fri Mar 6 00:21:04 IST 2009 i686 athlon i386
GNU/Linux
[root@localhost ~]#
```

Do you have any idea ?
