Dear All

In VE, MySQL always display this error.

I have to set Mysql Replication.But Mysql always crash.

Mysql master On Phyicsl machine
Mysql slave on OpenVZ VE

090314 7:00:02 [Note] /usr/sbin/mysqld: ready for connections.

090314 7:00:02 - mysqld got signal 11 ;
This could be because you hit a bug. It is also possible that this binary
or one of the libraries it was linked against is corrupt, improperly built,
or misconfigured. This error can also be caused by malfunctioning hardware.
We will try our best to scrape up some info that will hopefully help diagnose
the problem, but since we have already crashed, something is definitely wrong
and this may fail.
