Parallels Virtuozzo Containers (a commercial version of OpenVZ) provides the ability to deploy active-passive cluster solution based on RedHat Cluster Suite technology.

In case of OpenVZ I would like you to take a look at the following page  
[http://wiki.openvz.org/HA\\_cluster\\_with\\_DRBD\\_and\\_Heartbeat](http://wiki.openvz.org/HA_cluster_with_DRBD_and_Heartbeat) . I hope it may be useful to you or will give you some hint.
