Hello,

Quote:

Is OpenVZ a viable enterprise solution?

Of course, people use OpenVZ in production.

Quote:

Is it regularly updated?

OpenVZ kernels are regularly updated.

You can find information about stable, development, obsoleted kernels for example from here  
<http://download.openvz.org/kernel/>

About failover solution. Parallels Virtuozzo Containers provides an active-passive solution which is based on RHCS (Red Hat Cluster Suite). I think it's possible to implement something similar in OpenVZ, but I cannot provide estimates of how difficult it will be to do.

You may also look the following article. It describes another potential solution which may be useful in your situation

[http://wiki.openvz.org/HA\\_cluster\\_with\\_DRBD\\_and\\_Heartbeat](http://wiki.openvz.org/HA_cluster_with_DRBD_and_Heartbeat)
