Quote:

Kernel 2.6.18 028.18.1-2.6.18-12-1 from OpenVZ

I don't understand what this record means.

Is this "uname -r" output?

There was a similar bug but it has been already fixed.

Do you have a chance trying the last 2.6.18 or rhel5 based 2.6.18 kernels?

<http://download.openvz.org/kernel/branches/2.6.18/>
