Hello,

1. you can create a character device from inside the container but it's necessary to allow your VE to use it which must be made from the HN.

http://wiki.openvz.org/VPN_via_the_TUN/TAP_device

2. Please read user's guide

<http://download.openvz.org/doc/OpenVZ-Users-Guide.pdf>

"Loading iptables modules - page 69"
