I don't quite understand what you want.

How would it possible "to partition virtual space"?

If it suits you, you may create loop device inside VE and mount it.

```
# vzctl set 101 --devnodes loop0:rw --save
# vzctl set 101 --devnodes loop1:rw --save
# vzctl set 101 --devnodes loop2:rw --save
# vzctl set 101 --devnodes loop3:rw --save
# vzctl enter 101
# dd if=/dev/zero of=/root/filesystem count=100000
# mkfs.ext3 /root/filesystem
# mount -t ext3 /root/filesystem /mnt/
```
