---

I am also having a similar problem.

Strange thing is this

server host running cts is 10.0.0.3  
ct0 has the static ip 10.0.0.8  
gateway 10.0.0.2

server could ping gateway, and scape to internet  
ct0 could ping 10.0.0.3, but cant ping 10.0.0.2...so no internet

I follow that steps, I dont know why.

any help, in how to debug this with tcpdump?
