hi all,
I want some help for separate this server to 3 VPS
server: Intel(R) Core(TM)2 Quad CPU Q9650 @ 3.00GHz
Ram 8 GB

VPS1 50% form server power
VPS2 25% from server power
VPS3 25 from server power

some choose don't know what to do on it, so I make it like this

VPS1
Disk Quota 50% from hard drive
Number Of Backups unlimited
Burstable Memory (MB)(openvz Only) 4GB
Guaranteed Memory (MB)(openvz Only) 4GB
Number Of Processes(openvz Only) unlimited
Cpu Usage (%) 100/CPU 200
Traffic (MB/month) 50% from bandwidth
Uplink Traffic(KB/s) unlimited
CPU UNITS (default 1000) unlimited
IO Priority (0-7) unlimited
Number Of CPUS unlimited

VPS2
Disk Quota 25% from hard drive
Number Of Backups unlimited
Burstable Memory (MB)(openvz Only) 2GB
Guaranteed Memory (MB)(openvz Only) 2GB
Number Of Processes(openvz Only) unlimited
Cpu Usage (%) 100/CPU 100
Traffic (MB/month) 25% from bandwidth
Uplink Traffic(KB/s) unlimited
CPU UNITS (default 1000) unlimited
IO Priority (0-7) unlimited
Number Of CPUS unlimited

VPS3
Disk Quota 25% from hard drive
Number Of Backups unlimited
Burstable Memory (MB)(openvz Only) 2GB
Guaranteed Memory (MB)(openvz Only) 2GB
Number Of Processes(openvz Only) unlimited
Cpu Usage (%) 100/CPU 100

Traffic (MB/month) 25% from bandwidth
Uplink Traffic(KB/s) unlimited
CPU UNITS (default 1000) unlimited
IO Priority (0-7) unlimited
Number Of CPUS unlimited

I don't know if I make it in right, so anyone can help me to know what should do, specially in the unlimited sections

and thanks for adivce
