ok. Let's do the following:

1) Try to run `/vz/private/111/sbin/init`  
What you see?

2) Please, strace vzctl start:  
`strace -ff -o vzctl.out vzctl start 111`  
And attach files `vzctl.out.*` here.

3) And what template do you use? =)

Thank
