```
Address          HWtype  HWaddress          Flags Mask          Iface
1.1.1.5          ether   00:13:F7:C8:06:8E  C                   eth0
1.1.1.1          ether   00:18:F8:7C:21:81  C                   eth0
1.1.1.3          *       *                  MP                  eth0
```

HN: 1.1.1.2
VE: 1.1.1.3

i have inbound traffic (ssh, http and echo-request work fine) but no outbound traffic. could iptables on the HN be the problem?

```
Chain INPUT (policy ACCEPT)
target     prot opt source               destination
ACCEPT     udp  --  anywhere             anywhere            udp dpt:domain
ACCEPT     tcp  --  anywhere             anywhere            tcp dpt:domain
ACCEPT     udp  --  anywhere             anywhere            udp dpt:bootps
ACCEPT     tcp  --  anywhere             anywhere            tcp dpt:bootps
fail2ban-ssh  tcp  --  anywhere          anywhere            tcp dpt:ssh

Chain FORWARD (policy ACCEPT)
target     prot opt source               destination
ACCEPT     all  --  anywhere             192.168.122.0/24    state RELATED,ESTABLISHED
ACCEPT     all  --  192.168.122.0/24     anywhere
ACCEPT     all  --  anywhere             anywhere
REJECT     all  --  anywhere             anywhere            reject-with icmp-port-unreachable
REJECT     all  --  anywhere             anywhere            reject-with icmp-port-unreachable

Chain OUTPUT (policy ACCEPT)
target     prot opt source               destination

Chain fail2ban-ssh (1 references)
target     prot opt source               destination
RETURN     all  --  anywhere             anywhere
```

not sure how to use tcpdump. it gives me a crapload of output--most of it probably from a constant ping running for about the last 2 days.
