Subject: Failed to initialize HAL at Ubuntu 9.04 container startup

I have a VE with Ubuntu 9.04 installed from an official precreated template ubuntu-9.10-x86.tar.gz with installed ubuntu-desktop package by myself.I'm using FreeNX for remote control of my Ubuntu VE.
Problem: at VE startup I'm receiving "Failed to initialize HAL!" message.
Question: How can I fix HAL to let it work in Ubuntu VE or how can I avoid this problem with HAL, maybe by removeing HAL or substitution it by means of another software?
P.S. uname -r
2.6.26-2-openvz-amd64
cat /etc/issue.net
Debian GNU/Linux 5.0
