hi guyz Im new with my job..

I want some help from you guyz. hope you can help me
I have a CentOs Server with a openVZ.

I already install all of this in my CentOs

*vzctl-lib-3.0.23-1
*vzkernel-2.6.18-164.11.1.el5.028stab068.5
*vzctl-lib-3.0.23-1
*vzquota-3.0.12-1
*vzdump-1.1-2

and I already have 6 container I don't have a problem to create and manage a container, actually those 6 containers have already a running website.

now my problem is, it is possible to install a virtualbox to my container?

what I mean is Im going to create another container and install the virtualbox..

hope there is someone who can help me..
