Hi EveryOne:

I want to compile a 2.6.32 kernel, but the stable kernel is 2.6.9 and 2.6.18 while the 2.6.32 is under development.
I try to download the kernel src with this link(download.openvz.org/kernel/branches/2.6.32/), but there are so many folders, so I don't know which folder whould I follow.
thank you very much for any suggestions.
