This patchset is a cleanup and a preparation to unshare the pid namespace. These prerequisite prepare the next Eric's patchset to give a file descriptor to a namespace and join an existing namespace.

The initial authors of this patchset are Eric Biederman and Oleg Nesterov.

Changelog:

* patch 1/4 : wrapped test in a function
* patch 2/4 : handle proc_pid_ns_prepare_proc error
* patch 2/4 : put parent pid_ns on error
