Hi.
Template: debian-6.0-i386-minimal.tar.gz (2011-02-18 01:54:43)
On fresh build container i trying to install for example 'nginx':

root@new:~# apt-get install nginx
Reading package lists... Done
Building dependency tree
Reading state information... Done
The following extra packages will be installed:
  geoip-database libgeoip1 libpcre3
Suggested packages:
  geoip-bin
The following NEW packages will be installed:
  geoip-database libgeoip1 libpcre3 nginx

configured to not write apport reports
                                Errors were encountered while processing:
 nginx
E: Sub-process /usr/bin/dpkg returned an error code (1)
root@new:~#

How can i fix this? It happens not only with nginx.
Thanks, Kris.
