hello,
im using openvz to host 1 vps for cpanel and i have serious issues with the high load on the vps.
every tiny action i make on vps, leads the load very high

the cpanel and some friends tryes to fix it but they couldnt

i read here; forum.openvz.org/index.php?t=msg&goto=12058&

but it did not helped me

current vps utilization; 27000
power of the node; 1068770
cpu units 7
ram available 8 gb

tell me please what to check or what info to provide.

regards
