Hello,

Could you tell me why

vzlist -a

shows

```
      CTID      NPROC STATUS    IP_ADDR         HOSTNAME

   2222903       1876 running   212.48.121.80   bestvps
```

And when I do:

```
[root@h146 ~]# vzctl exec 2222903 "ps aux | wc -l"
71
```

So why vzlist shows 1876 processes and ps shows 72 ?
