This is the output:

```
[root@test /]# chkconfig --list NetworkManager
error reading information on service NetworkManager: No such file or directory
[root@test /]# service NetworkManager status
NetworkManager: unrecognized service
[root@test /]# chkconfig --list network
network      0:off 1:off 2:on 3:on 4:on 5:on 6:off
```

I had tried to put boot scripts to try to bring up the interface, but no luck as well.
