dev wrote on Sun, 09 July 2006 15:31 it more looks like bug #141

([http://bugzilla.openvz.org/show\\_bug.cgi?id=141](http://bugzilla.openvz.org/show_bug.cgi?id=141)) which is fixed in 2.6.16-026test010.

Why don't you use latest 2.6.16-026test015 which includes mainstream fixes up to 2.6.16.20?

Yep, I know. I had downloaded this version once I found the problem, but to perform an upgrade I should port some private patches to the new version and this requires some time.

P.S. I've just completed the upgrade, the problem went away. Thanks.

P.P.S. Frankly, developers release kernels too rapidly, so we cannot brag about server's uptime anymore
