I want check containter memory usage with vzlist command, but how?

1) Image
PRIVVMP: 2993
SHMP: 16
(?) Total memory in kB: (correct?) (2993+16)*4096/1024 = 12036

free command: 12368

difference: 12368-12036 = 332

2) Image
PRIVVMP: 3235
SHMP: 16
(?) Total memory in kB: (correct?) (3235+16)*4096/1024 = 13004

free command: 13336

difference: 13336-13004 = 332

Why is always 332kB difference?
What is wrong?
