Subject: ploop sanity check

On a Centos 6 test machine, I installed kernel 2.6.32-042stab052.8, ploop-1.0 & ploop-lib-1.0 and attempted to follow along with http://wiki.openvz.org/Ploop/readme.

I've had no success in creating a ploop image:

```
root@mrmber ~]# ploop init -s 1g -f raw /ploop.image
Creating raw delta /ploop.image size=2097152 sectors
add snapshot {5fbaabe3-6958-40FF-92a7-860e329aab41}
Storing /DiskDescriptor.xml
Can't resolve : No such file or directory
[root@mrmber ~]#
```

I'd be curious if anyone has gotten farther, and am curious as to what I might be lacking

Regards,

jjs
