check the last entry in FAQ: on 2.6.8 kernels you need to enabled conntracks in host system which are disabled by default.

<http://openvz.org/documentation/faq>

also check wiki page about NAT if needed:

[http://wiki.openvz.org/Using\\_NAT\\_for\\_VE\\_with\\_private\\_IPs](http://wiki.openvz.org/Using_NAT_for_VE_with_private_IPs)
