Subject: [PATCH 00/10] NFS: callback threads containerization
Posted by Stanislav Kinsbursky on Thu, 26 Apr 2012 15:54:51 GMT
View Forum Message <> Reply to Message

This aptch set depened on "SUNRPC: separate per-net data creation from service creation" patch set sent earlier.

The following series consists of:

Stanislav Kinsbursky (10):
NFS: pass net to nfs_callback_down()
NFS: callback service creation function introduced
NFS: move per-net callback thread initialization to nfs_callback_up_net()
NFS: callback up - transport backchannel cleanup
NFS: callback service start function introduced
NFS: callback up - users counting cleanup
NFS: make nfs_callback_tcpport per network context
NFS: make nfs_callback_tcpport6 per network context
NFS; callback per-net usage counting introduced
NFS: add debug messages to callback down function
