Thanks for your answer

i m using a shorwall firewall

i have this in my default policy, my Host is fw

```
net      all      DROP      info
fw       all      ACCEPT
loc      all      ACCEPT
loc      venet    ACCEPT #
venet    all      ACCEPT
all      all      REJECT    info
```

And it doesn't work.

But if i replace the last line with

```
all      all      ACCEPT
```

it work. but this rule is very permissive

i triyed many combination ... no good result !

Perhaps the problem is that venet0 isn't a real ethernet interface ? so we can't do this simply ...

Thanks.
