Hi,

We are looking for a system administrator for the support of our web server.
Web server architecture is described below:

- PROXMOX web server (hosted by OVH)
- One VPS "stand-aline": PLESKn MYSQL + PHP 5.2.7 (and some additional modules)
- One load balanced architecture: PRESL, 2xVMs application, VM shared storage, load balanced MYSQL (master/slave replication)
- One windows VPS

We are looking for a support provider having knowledge and experience in each component of our architure.
French speaking is a plus.

Please contact me by email at the address [laurentlATelyotechDOTcom].

Regards,
Laurent Lemaire
