Quote:Is it absolutely necessary to mount the VE first or can I just copy from the HN into /vz/private for the particular VE - *provided* the VE is stopped?

No, it isn't necessary and you can copy files to /vz/private.

But I think, there will be some problems with quota (it'll be not right) after that.

Quote:Also, is there a method for copying a file(s) from the HN into a *running* VE? (other than scp, ftp...)

Just copy needed files to /vz/root/VEID/...
