Ubuntu 11.10 Installed Xorg, connect with vnc4server

I can't run composite manager xcompmgr, it say "No render extension".
Is it problem with video drivers? How can I configure X11 to use all extension for correct graphic?

Xorg -configure
(EE) Failed to load module "vmwgfx" (module does not exist, 0)
(EE) vmware: Please ignore the above warnings about not being able to to load module/driver vmwgfx
(EE) vmware: Unexpected failure while loading the "vmwlegacy" driver. Giving up.
(EE) Failed to load module "vmware" (a required submodule could not be loaded, -1078422024)

Fatal server error:
xf86EnableIOPorts: failed to set IOPL for I/O (Operation not permitted)
