Hello.

I have openVZ VPS and ostemplate debian-6.0-x86
uname -a
Linux vz12745 2.6.32-042stab063.2 #1 SMP Tue Oct 23 16:24:09 MSK 2012 i686 GNU/Linux

already installed quota, quotatool
Quote:
QUOTAUGIDLIMIT="100"

But when I try:
Quote:
edquota user
No filesystems with quota detected

Is something that should be in /etc/fstab? My is just like this

proc /proc proc defaults 0 0
none /dev/pts devpts rw 0 0

Do you have some how-to's that work?
