Subject: rhel 6.4 kernel support ?

Hello,

I'm working on the proxmox openvz/kvm distribution, and I would like to known if the support of rhel 6.4 kernel is on the roadmap ?
I recently see a lot of backport from rhel 6.4 to rhel 6.3 kernel, I don't known why ? (maybe it's too hard to port openvz to rhel 6.4 kernel ?). Is rhel 6.4 kernel on the roadmap ?

I ask the question because proxmox use both openvz and kvm, but I need some kvm patches from rhel 6.4. (Mainly hyper-v support inside kvm).

Best Regards,

Alexandre Derumier
