Hi,
I'm new here, I have a hosting company and one of my openvz servers is showing the following error and I haven't been able to get around it.
Would appreciate your help.
while running yum update I get the following at the end:
--> Finished Dependency Resolution

You could try using --skip-broken to work around the problem
You could try running: rpm -Va --nofiles --nodigest

How can I get it to actually apply the update without getting this error?

This is a CentOS 6.4
