Hi

all openvz VM is very slow to start sending emails... using centos7 (in VM)

Email is sended, but... had a long time (more 60s) to out... using form site... is very bad to user...
how to solve this ?

I tested same setup in machine non-openvz... and work very fast, immediated...

I tested same setup using external smtp...and too is very fast to start/send...

exim main.log

```
2016-07-29 09:13:12 exim 4.84_2 daemon started: pid=46827, -q1h, listening for SMTP on port
25 (IPv6 and IPv4) port 587 (IPv6 and IPv4) port 2525 (IPv6 and IPv4) and for SMTPS on port
465 (IPv6 and IPv4)
```

```
2016-07-29 09:13:37 Start queue run: pid=47355
```

```
2016-07-29 09:13:37 End queue run: pid=47355
```
