Hello,

Seems we can't install Win server 2008 or 2012 , the VM is stopping on boot.

```
UUID                                   STATUS       IP_ADDR         T  NAME
{014b496d-2c02-42ee-a555-112e6ae1e4fc} paused       -               VM Windows2012
[root@shared-2-3 vz]# prlctl resume Windows2012
Resuming the VM...
Failed to resume the VM: Operation failed. Failed to execute the operation. (Details: internal error:
unable to execute QEMU command 'cont': Resetting the Virtual Machine is required)
```

We need some help is someone encounter this err.

Thanks.
