Subject: vzquotamod is needed by vzquota-3.1-1.x86_64

I am installing OpenVZ on an existing Centos 7.3 ISPConfig installation using rpms picked from https://download.openvz.org/virtuozzo/releases/openvz-7.0.1- 554/.

Most of the RPMs have installed OK after chasing down the dependencies but vzquota-3.1-1.x86_64.rpm has a failed dependency, vzquotamod, which I can't seem to find anywhere. I've tried Googling for it, obviously. As far as I can tell it is/was supposed to be provided by the vzkernel package but the current SRPM spec file of vzkernel doesn't mention it.

Is it provided by another package? If so which one?

CentOS Linux release 7.3.1611

These are the rpms I have installed so far satisfying dependencies:
libvcmmd-7.0.12-1.vz7.x86_64.rpm
libvzctl-7.0.293-1.vz7.x86_64.rpm
libvzevent-7.0.7-1.vz7.x86_64.rpm
ploop-7.0.74-1.vz7.x86_64.rpm
ploop-lib-7.0.74-1.vz7.x86_64.rpm
vzctl-7.0.120-1.vz7.x86_64.rpm
vzkernel-3.10.0-327.36.1.vz7.18.7.x86_64.rpm
vzkernel-devel-3.10.0-327.36.1.vz7.18.7.x86_64.rpm
vzkernel-headers-3.10.0-327.36.1.vz7.18.7.x86_64.rpm
vztt-7.0.43-1.vz7.x86_64.rpm
vztt-lib-7.0.43-1.vz7.x86_64.rpm
