Subject: New installation SSH access maxes out at 10mbps

On our new OpenVZ7 server we've found our SSH speeds are maxing out at 10mbps. This is not the case on the previous two, and no configuration was changed from our normal.

We've tested wget and ftp speeds and they both allow much, much higher speeds (closer to our actual bandwidth limit), but SSH / SFTP / Rsync / SCP are all 10mbps.

Has anyone else come across this? How did you resolve it?

Thanks!
