noc.r wrote on Thu, 03 September 2020 12:37I have a few machines that have an updated kernel: 3.10.0-1127.10.1.vz7.162.9

Could we please have the kpatch-kmod and the kpatch.ko for this kernel so that we can try the patch?

Unfortunately, not yet. Currently, live patches are only built for the kernels from Virtuozzo releases and hotfixes. Kernel 3.10.0-1127.10.1.vz7.162.9 is not yet supported there.

I can try to build the modules for that particular kernel manually though, perhaps, in a day or two.
